Every Exhibitor in Centre of Main Floor Must Make Good Display.

TO SHOW FLYAWAY III.

In the last two yachting seasons a class of motor yachts known as express ruisers has been developed, of which ne Flyaway III. and Houp-La are the best known. These boats make from 20 to 25 miles an hour and have taken part in many long distance races. A high speed boat is in many ways an experiment, and after the designers have obtained the speed they then use the knowledge obtained in experimenting with speed to develop the cruiser and the commercial vessel. The yachtsman who spends his money to develop the high speed racers is helping the whole

The Flyaway III. was really the pioneer of these express cruisers. She was MOTOR BOAT SHOW built in 1914 from designs by W. H. Hand, Jr., and her dimensions are 38 feet long, 8 feet 4 inches beam and 2 feet 8 inches draught. She has a 6 cylinder Van Blerck motor of 150 horsepower which turns an Allsa Craig wheel Much May Be Learned by En- Auxiliary Ketch Built for Ad-1,100 revolutions a minute. In thirteen long distance races the Flyaway established new records. She won twelve first prizes and was beaten in the Block Island race because she had to allow 7 hours 7 minutes 21 seconds over a course of 116 miles. Several boats were built for this class last year, and many more are to be in the racing this year.

miles an hour. The cockpit will seat ten or twelve persons, and as a cruiser it can accommodate four to six persons, so it has the combined advantages of a cruiser and department. The United States Coast and Geodetic Survey will a combined advantages of a cruiser and a resolution. The United States Coast and Geodetic Survey will double headsails.

pany will exhibit a V-bottom boat, a type that has become popular.

The Winton and Scripps companies have taken space jointly and will show an attractive boat. Fay & Bowen will exhibit a 30 foot raised deck runabout designed by Whitaker, a 25 foot family rumabout and four and two cycle engines.

Tropic and Coast Devices."

shown by the Lane Lifeboat Company and the Welin Marine Equipment Company.

The Diesel engine is growing steadily in popularity with yachtsmen. The Nesco motor is used in all the American built submarines and in some yachts, and one of these motors will be seen in the show. James Craig, who is now building two of his type of heavy engines for a yacht building at City Island, will have one on exhibition; the Marine Oil Engine Company will exhibit one of Swedish model, and Fairbanks, Morse & Co. will show a 100 horse-power semi-Diesel which has a maximum speed of 149 revolutions per minute.

The Cornfield lightship race of the with four motors of eight cylinders, each this year. Under the new rules of the American Power Boat Association Fly-away III., which won last summer, averaging twenty miles an hour significant properties of similar type will be barred, so that boats of eight to ten miles an hour speed will have fair chances of success.

The Navy Department recently issue specifications for a high speed moto boat to carry an 18 inch torpedo and one pounder rapid fire gun. The box was to make thirty-four miles an hour specifications for a high speed moto boat to carry an 18 inch torpedo and one pounder rapid fire gun. The box was to make thirty-four miles an hour speed of forty-one miles in secretary, A. M. Coyle, Jr.; treasurer, W. H. Latimer; governor for two years, C. F. Chapman; governor for two years, c. C. R. C. Well and the control of the pounds. It is fitte with four motors of eight cylinders, each this year.
